

Dear Recruiter,

I am an experienced linux system engineer.

I am familiar with backup and monitoring technologies, virtualization (especially LXC and KVM), exotic filesystems (zfs, btrfs), network filesystems (glusterfs, Lustre, moosefs) and other common services like web and email servers.

I am passionate and hardworker, someone who likes to see the effect his work.

However currently my location is Hungary, I'm willing to relocate to The Netherlands in very short time..

Sincerely,  
Tamas Papp
